Editorial

"Without imagination, there can be no creation."

Albert Jacquard

It is with great pleasure that we present our 2023-2024 collection, showcased by the four guest chefs of the season: Julien Alvarez, Tom Coll, Etienne Leroy and Marie Simon.

To stage the Chefs' creations, this season we have once more let our imaginations run wild and free; to express ourselves, to escape, to smile, to imagine, to discover, to create, to marvel, to share. Because that is also the aim of this collection: to give you the opportunity to enter the world of our Manufacture of emotions, and the people who make it happen. The world of a passionate team, who use all their know-how and creativity to offer you unique, innovative and ever more responsible products.

Leaf through this catalogue, (re)discover our different worlds: decorations - ready to go or to be made -, chocolate kits, entremets moulds, ingredients, colourings etc. and get inspired. We hope you enjoy this new collection and that you take pleasure in imagining and shaping gourmet creations with our products. Please feel free to send us your comments and creations: we will be delighted to share them with our entire community.

Have fun creating!

You are the Chefs!

Moulds for Kits

Symbol of femininity, the lipstick has never been so appealing. Get carried away by this enticing variation.

With or without printing, make the most of this seductive “breath of fresh air” to send a message of creativity to your clients and have them taste your most amazing creations. Very simple to use, simply pour the chocolate into the two parts of the blister and then unmold before sliding into the lipstick tube. And then you’re “ready to go” with this fascinating discovery.

HALF SHELLS TO FILL

PCB has developed a unique concept to easily make filled candies.
Place the first half-shell blister sheet in the magnetic mould.
The second blister sheet is placed in the other half of the mould.
Pipe the filling of your choice into the half shells, remove the protective
edge cover around the halfshell (no waste/no mess). Then simply close
both sides of the magnetic mould together and leave to cool for 4 hours.
This will give you wonderful decorated filled candies.

Pompoms & Pomponettes

CAUTION THESE PRODUCTS MUST BE FILLED AND FROZEN
IN ORDER TO BE USED.

Pompoms and Pomponettes are the fruit of a technique invented and perfected by PCB: the extra-thin shells can be filled with a wide variety of mixtures then frozen. Then just turn out as needed.

These shells will sate any sweet or savoury craving.

The Pompoms can be filled with mousse or cake (like traditional entremets), ice-cream, coulis, cream cheese... Just freeze to create wonderful individual entremets that are already finely glazed and decorated. The thin shell is easily broken with a dessert spoon, making them so easy to enjoy.

We are proud to represent real "Made in France" quality.

That's why we would like to propose this new range of tart shells. We have chosen to work with French partners and quality local products in order to better control traceability, limit the impact on the environment and above all stay in line with artisan craftsmanship. We want to highlight the purity of our carefully selected French ingredients (butter, flour, free range eggs...), and have removed all artificial flavourings and colourings that might interfere with the taste of your toppings.

Customise your moulds

THERMOFORMED & SILICONE

+ R =

The Manufacture

Our French Manufacture is equipped with specialized machines for prototyping and making custom moulds. Your projects are entirely produced in our workshops in Alsace, France.

Our design team focus on shaping your ideas. Then manufacture expert hands are taking over for the shaping on machines, from the testing phases until the final rendering.

Thermoformed moulds

PCB CRÉATION OFFERS MULTIPLE THERMOFORMED SOLUTIONS TO CREATE YOUR PRINTED OR NEUTRAL MOULDS IN THE REQUIRED QUANTITY:

Our creation studio designs exclusive customised thermoformed moulds, in small and large series, according to your needs, requirements and desires. Our expert team can advise you on how to carry out your project. There are many possibilities:

- thermoformed moulds for chocolate mouldings, neutral or printed
- structure sheets for chocolate or desserts
- thermoformed blisters for plaques or decorations
- dessert moulds: individual or for sharing, reusable or tearable.

PCB Création's thermoformed moulds are manufactured in our factory in Alsace, using PET, a 100% recyclable material, which reduces our carbon impact and limits energy consumption. We also offer a range of "classics" moulds (domes, rounds...) and "signature" which you can find in the next pages. We have rethought their design: the dimensions have been adapted to fit 600 x 400 mm plaques with 4 or 6 moulds depending on the model, for easier handling and use.

Our team is at your service to offer you a solution that best matches your needs. Do not hesitate to contact us to discuss your customised projects.

Silicone moulds

PCB CRÉATION NOW HAS A SPECIALISED WORKSHOP TO CREATE YOUR SILICONE MOULDS:

We create and shape unique silicone moulds for you in our new specialised design office where our expert team use state-of-the-art equipment. A new service developed with one goal: to make the unique accessible to you. No minimum order (from a mould to several thousand), affordable equipment costs, different processes available, adapted to your requests, and short production times (2 weeks to create your prototype and 4 to 5 additional weeks to manufacture your mould or moulds).

PCB Création silicone moulds are made in our factory in Alsace, using premium silicone, produced in Europe, with remarkable mechanical properties. It resists temperatures from -40°C to +220°C, and even more in some cases.

Our team takes all your requirements into account to provide you with a tailor-made solution perfectly adapted to your needs (moulds for logs, desserts -individual or for sharing- or even moulds for chocolate, plaques, stamps, etc.).

Individual Entremets Moulds

Reusable and **freezable**, these moulds allow you to remove your desserts with ease. We have in fact designed a "**support jamb**" around most of our reusable moulds which you can pour hot water into in order to **remove your desserts more easily**. Our range includes individual moulds, dessert moulds and yule log moulds.

Clean Label Ingredients

Our ambition is to offer you plant-based technical solutions, which is why we have developed this category of "Clean Label" ingredients products. They allow you to be more transparent in your declarations as **you can declare them as ingredients and not as additives**.

Discover our new product: **Natur Alg**, an algae fibre based **gel-forming solution**. It is a unique ingredient with a **neutral taste** that allows you to obtain a jelly-like texture or can be used to make your dairy-based preparations smoother.

It is a **good alternative to carrageenan** because, thanks to this solution, it is now possible to create jellyfied preparations vegan & without additives!

Discover or rediscover the rest of our "Clean Label" range:

Natur Lin and **Natur Agrum** are texturising solutions made of vegetable fibres.

Using them will improve your products' nutritional qualities.

Natur Lin and **Natur Agrum** can be used both hot or cold.

They are resistant to different temperatures, acidic pH levels and mechanical stress,

This is an innovative solution to substitute additives such as modified starches , food gums and emulsifiers.

Natur Air is a **vegetable protein** (potato protein).

It is an ideal and practical solution to **fluff up** and **stabilize** mousses and foams.

This clean label solution is perfectly suitable for a **vegan** diet.

Natur Air works well at different pH levels, can be used both hot or cold, and offers a clean and neutral organoleptic profile without leaving a bad aftertaste.

It is a vegetable-based solution that can often be used to replace egg whites

such as in macaroons, meringues, mousses, cocktails etc.

Texturizers & starches

The gelling, thickening and stabilizing properties of INGREDIUM Texturizers & Starches will diversify recipes, facilitate implementation, guarantee constant quality between different productions and during storage, provide more texture to products (firm, supple, creamy, elastic, aerated) or even reduce the fat and sugar in recipes while maintaining their level of delicacy.

These solutions can be used to thicken directly when cold or hot without altering the original flavour of sauces, coulis, purées or creams. They will also make it possible to create preparations with unique textures such as fruit or vegetable jellies and inserts, toppings, fruit or vegetable pastes, jellies or pana cotta.

INGREDIUM

For example, you can find our **GELATIN F**, **GELATIN B** and **GELATIN P** gelatins, which, thanks to their gelling properties, are suitable for all types of preparation and are available in several variations (made from fish, pork or beef).

And to make your daily life easier, discover our new product: GELATIN FAST.

This instant gelatin **does not need to be pre-hydrated or heated** to work and can be used to gel preparations in **less than 2 hours**. Furthermore, it can be declared as an ingredient as it is made of **100% powdered bovine gelatin**.

ALBUMEN is the last of our texturizing solutions; an egg white protein with several technical functions: foaming, emulsifying, coagulating and expanding.

ALBUMEN is ideal for **replacing egg white** and ensuring consistency for your mousse, meringue, macaroon and biscuits recipes etc.

Acids & Salts

The acidifying, mineralizing, antioxidant and acid modulating properties of INGREDIUM **Acids & Salts** will provide the little extra push needed for the gelation of certain texturizers in this range or will allow you to subtly balance the taste profile of some of your unique creations.

These solutions allow, for example, spherification from alginates or the creation of jelly recipes using carrageenan or pectins. They can also optimize the acidity of preparations that could not be spherified or have an antioxidant effect to preserve certain sensitive fruit based creations until placement and serving.

Sugars & Derivatives

The diversity of the sweetening, structuring and colouring properties when cooking **INGREDIUM Sugars & Derivatives** will allow you to diversify recipes, desugar while preserving the rich taste and aromas of your sweet creations and also guarantee constant quality between productions and during storage.

These technical solutions can make it possible, for example, to optimize the recipes of your ice-creations in order to guarantee texture stability during storage or to stabilize your fruity ganaches in order to avoid phase shift and syneresis phenomena. They will also make it possible to substitute sucrose in many applications to reduce its sugar content or to modulate, for example, crystallization or colouring during cooking.

OUR TIPS

TIP N° 1

To make creations with a harmonious balance of flavors between white chocolate and fruit we recommend adding 5% freeze-dried fruit powder to your covering chocolate. Please note that the use of fruit powders in milk chocolate, white caramelized chocolate, and fortiori dark chocolate, creates a more subtle color shade than with white chocolate, all the while maintaining the intensity of the flavors.

TIP N° 2

How to use freeze-dried fruit powder in chocolate?

Just add the powder to the tempered chocolate. It does not inhibit tempering and will mix in like any powdered dye or food colouring...

TIP N° 3

How to use freeze-dried fruit powder in other applications?

Mix the powder with a portion of the powdered sugar from the recipe to facilitate its dispersion in the mix.

ADVICE FOR USE POWDER & PIECES

After putting freeze-dried fruit powder in your chocolate, can we still call it chocolate?

According to European legislation, you can call it your fruit-chocolate creation if you do not include more than 40% fresh fruit in your covering chocolate.

Here is a simple chart showing the maximum amount of powder you can add to 1kg of chocolate and our recommendations for best results.

AS A GUIDELINE: FOR 1KG OF CHOCOLATE		
POWDER	PCB recommendation (5% of powder)	Legal limit*

*Taste: variable depending on the product and the amount used.

** Colour: variable depending on the product and the amount used.

** The declaration statement, quantity limits and possible uses depend on the regulations in force in the country of marketing and/or export and sometimes have no direct link with the natural qualities of the material in question. It is therefore very important to double check these aspects when creating your recipe.

Here, we show you current regulations for Europe.

OUR TIPS

TIP N° 1

To make creations with a harmonious balance of flavors between white chocolate and fruit we recommend adding 5% freeze-dried fruit powder to your covering chocolate.

Please note that the use of fruit powders in milk chocolate, white caramelized chocolate, and fortiori dark chocolate, creates a more subtle color shade than with white chocolate, all the while maintaining the intensity of the flavors.

TIP N° 2

How to use freeze-dried fruit powder in chocolate?

Just add the powder to the tempered chocolate.
It does not inhibit tempering and will mix in like any powdered dye or food colouring...

How to use freeze-dried fruit powder in other applications?

Mix the powder with a portion of the powdered sugar from the recipe to facilitate its dispersion in the mix.

Shiny colours

This food colouring will make all your products shine and give them an incredible spark.

You have various possibilities:

In powder:

- spread it with your finger
- sprinkle it on the chocolate
- sprinkle some powder over a nylon sheet

Scrub with your finger and place the dipped chocolate bonbons over the sheets.

By diluting with alcohol: apply it with a brush.

100% Fruit/Vegetal Cocoa butter

We've created a range of fruity cocoa butters especially for you, made from cocoa butter and freeze-dried fruit/plant powders, 100% natural, without colourings; to make a velvet effect using a spray gun or just as they are to naturally add colour to all your creations. Used in velvet on your entremets, these cocoa butters richer in fruit and fiber than a classic cocoa butter (up to 30%) are therefore less brittle, and bring more elasticity for creations with perfect visual and holding. They also bring a touch of fruity taste, a real plus to a classic cocoa butter.

Velvet Sprays

These sprays make it possible to give a **velvet effect** on your frozen desserts or entremets:
We developed an exclusive new formula: no need to be put in drying oven, our new sprays can be **used at ambient temperature**.
 Let your creativity run wild: underline the "relief" of your dessert, draw using a stencil key set... **You are an artist!**

METHOD OF USE:

Keep the product at room temperature (20-25°C/ 68-77°F) for at least 2 hours before use. Shake well before use.
 Spray an even layer of product on a cold surface from a distance of 20-25 cm.
 After use, turn the spray can upside down and spray for a few seconds to clean the dispenser. Store at room temperature*

*If the product has been stored at a temperature <20°C/ 68°F, place in a bain-marie or oven (35°C/95°F) for around 20 minutes to liquefy the product before use.

THE TWO PRODUCTS BELOW CAN BE USED FOR GLAZING, FINISHING AND PROTECTING CHOCOLATE COATED SUGAR CONFECTIONERY.

Varnish for
Moulding
& Coating

070268 is a glazing solution based on gum arabic which is used to gloss the sugar-coated confectionery and should be applied first. 061076 is a shellac based glazing solution that provides a protective layer against moisture and air and should be applied last.

- The surface of the chocolate coated centers must be completely solidified before applying the finishing solutions
- The air blower for drying the dragees following application of the finishing solutions must comply with the following characteristics
 - maximum 45-50% relative humidity
 - 10-12°C for white chocolate, 12-14°C for milk chocolate and 16-18°C for dark chocolate

061076
Varnish pearly for chocolate moulding - 200 g
N/A: China, Japan, UAE, Saudi Arabia, Kuwait, Oman, Bahrain, Qatar

070268
Coating solution made of gum arabic - 1 Kg
This product must be shaken sufficiently before use because it tends to phase out.
N/A: UAE, Saudi Arabia, Kuwait, Oman, Bahrain, Qatar

A TYPICAL EXAMPLE WITH CHOCOLATE COVERED HAZELNUTS:

	PRODUCT USED	QUANTITY (mL/100Kg)	MIXING WITHOUT AIR BLOWER	DRYING WITH AIR BLOWER
1ST LAYER	070268	250 mL	1-2 min	7-10 min
2ND LAYER		150 mL		
3RD LAYER		100 mL		
LAST LAYER	061076	130-170 mL		5 min

These solutions can be applied simply by pouring the recommended amount using a measuring cup or syringe. When using a spray system, it is vital to use two separate systems for the two products as these solutions are not compatible. After these different layers have been applied, the dragees must be set aside for at least 2 hours to finalise the drying process before packing. We recommend storing them in an environment with the same atmospheric conditions as those used for glazing.

DÉCOR À MODELER

Discover our modelling décor recipe ! Its new, more malleable texture allows for easy modelling, and its newly refined ingredients bring out its great white chocolate flavour. Mouldable like marzipan, you can cover your desserts and create fabulous hand-made decorations or use a pastry cutter. To be used alone or with the support of a silicone mould, you can no longer do without this magical paste!

BLISTERS TO FILL

The references below refer to blisters.

All you have to do is add your own chocolate to the different moulds and voila! you get magnificent decorations. Using these blisters couldn't be easier.

Before using: Your room and your work surface must be tempered to +22°C/ 71,6°F, to optimize the removal and demoulding of your decorations.

Printed blisters: Fill the blisters with your chocolate (be careful to keep the temperature of the chocolate at its optimum level through out the filling process). Lightly vibrate/shake the blister pack for 15 to 20 seconds. Then land the chocolate slightly crystallise (1 minute) without moving the blister pack. Refrigerate at 4°C/ 39,2°F for 30 minutes to 2 hours depending on the size and volume of the products. Unmould by pushing gently from underneath

Neutral blisters: Fill the blisters with your chocolate. Lightly vibrate/shake the blister pack to drive out air bubbles. Refrigerate at 4°C/ 39,2°F for 30 minutes to 1 hour depending on the size of the chocolate pieces. Unmould.

Neutral blisters are reusable: you can clean them with cotton wipes. Please note that the gloss effect will decrease gradually with use.
