We nurture fruit excellence

EXCELLENCE, A TEAM EFFORT

In 2024, our mutual ambition is to attain excellence by showcasing the best of our fruit.

Excellence is a requirement that we are fully dedicated to achieving, in every aspect. We nurture excellence every day, at every stage and in all levels of our company, in France and worldwide. The premium quality of our products, Fruitology®, and our practices that care for people and nature have shaped our desirable, sustainable, flavourful gastronomy.

Excellence is a responsibility, a commitment. We nurture it every day throughout the value chain, by building sustainable, resilient supply chain, reducing our impact on all natural and fossil fuel resources, involving ourselves in the local community, saving energy and water, and researching and developing more eco-friendly packaging. Each action comes from a position of humility, as well as pride in being a major player, actively involved in protecting and regenerating our environment and caring for nature.

Excellence binds us together. At Les vergers Boiron, we are all connected by our passion for fruit. Thanks to you, we have become a global benchmark in the culinary arts. We believe in the strength of our relationship with nature, and with our producers, chefs, distributors and staff. We encourage a collaborative working environment, the transfer of knowledge and skills, and the pleasure of shared, sociable moments. Our collaborative approach enables us to grow and form genuinely sustainable, human partnerships.

Excellence is singular. Our brand's new visual identity, which you will discover in this catalogue, is designed to highlight Les vergers Boiron's expertise, simply and elegantly. The new colour palette proclaims the colours of a bold, inspiring future.

*Excellence is our strength.
Let's nurture it together!*

Alain Boiron, Chairman
Grégory Watine, CEO

//

*Thanks to you, we have
become a global benchmark
in the culinary arts.*

*We believe in the strength
of our relationship with nature,
and with our producers,
chefs, distributors and staff.
We encourage a collaborative
working environment and the
transfer of knowledge and skills...*

Excellence, at every stage

Like a virtuous circle, excellence is the result of successive actions, designed to continually improve quality, at every stage.

RIGOROUS SELECTION

Everything begins with the meticulous work of our buyers, who identify the best growing regions and the best varieties of fruit around the world.

THE ART OF BLENDING

Once the fruit is classified according to its properties, our experts blend several batches of varieties, from different harvests or sources. The result is a fruit puree with consistent flavour, quality and texture.

PRECISE PROCESSING

To retain its organoleptic properties and flavour intensity, each fruit undergoes a specific pasteurisation process.

A GLOBAL PRESENCE

Our distribution network extends across the world, giving international chefs access to our solutions all year round, wherever they are.

A PASSION FOR INSPIRING

Our products and our Fruitology® expertise deliver a precious ingredient for use in desserts, sorbets, beverages and even savoury dishes, created by artisans of flavour. We're proud of our humble contribution to a taste for the good things in life, creating memorable moments to share among friends.

+ 133

We inspire the pleasure of sharing

EXCELLENCE, A SOURCE OF CREATIVITY

Continuously, we create exceptional fruit solutions for culinary and beverage professionals to showcase in their creations. As influencers of fruit-based, responsible gastronomy, we are committed to sharing our know-how and creativity to inspire professionals all over the world and create unique moments for people to share.

AN INSPIRING COMMUNITY

1 global ambassador chef:

Yann Brys, Meilleur Ouvrier de France Pâtisserie (2011)

1 world corporate chef:

Thibault Marchand

6 pastry chefs working in the company:

Michael Laïskonis, Gaël Etrillard, Yukiko Kamauchi, Vivian Zhou, Jean-Christophe Duc, Corentin Magnin

4 technical consultants and partner chefs:

Alessandro Tiscione, Kriss Harvey, Philip Khandehrish, Bret Kollman Baker

"b fruit collective": a circle of international ambassadors

Alexis Beauvils, Anne Coruble, Marc Ducobu, Miquel Guarro, François Josse, Sebastian Kraus, Graham Mairs

FRUITOLOGY®, AN AID TO CREATIVITY

Fruitology®, created in our workshops in 2019, is our patented discipline dedicated to the study of fruit and its transformation into fruit purees. It is based on sensory analysis, a scientific discipline that uses the human senses as a "measuring tool".

The product characteristics are evaluated using the 5 senses. Sensory analysis gives us a better understanding of consumers and helps us improve or create products that meet their expectations. It's also a great tool for boosting the creativity of culinary and beverage professionals!

Promoting a responsible, desirable gastronomy

At Les vergers Boiron, influencing fruit-based gastronomy is a full-time job. It involves:

- *Helping to develop the practices of flavour artisans*
- *Making sure our innovations are enjoyable, natural and responsible*
- *Developing our network of ambassadors*
- *Rolling out Fruitology®*

For example,

All our fruit solutions are made without added sugar and with fruit picked at perfect maturity. We are constantly enriching our range, which boasts 131 products and 59 flavours. This year, sudachi, açai and red prickly pear have been added to our product range, inspiring pastry chefs, ice cream makers and bartenders all over the world.

Developing an enlightened, inspirational company around a responsible ecosystem

We believe that trust and cooperation between staff and stakeholders form the basis of a responsible, committed ecosystem. We have implemented several actions:

- *Developing a social policy* and a culture of trust
- *Training and awareness raising* for staff on environmental and societal issues
- *Participating in the first "Convention des Entreprises pour le Climat" (Climate Agreement for Businesses - CEC):* an initiative bringing together 150 companies committed to making business more ecological and sustainable

For example,

For the third consecutive year, Les vergers Boiron has been certified a Great Place To Work®

Selecting, assembling, transforming, serving, inspiring, ...

At Les vergers Boiron, we cultivate excellence in everything we do.

Excellence that we have developed over 80 years, creating exceptional fruit-based solutions for you to use.

Excellence that you recreate each day by turning our fruit purees into your sublime culinary creations.

Excellence that is the fruit of collective endeavor, which we strive to support in our past, present, and future.

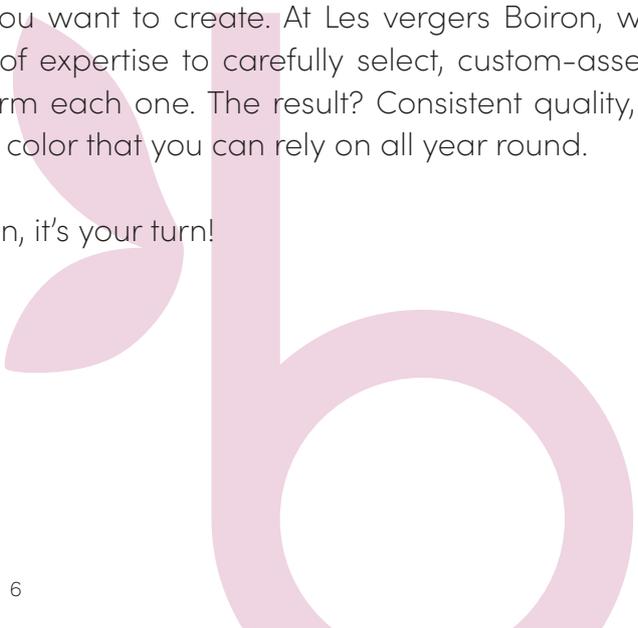

To help you innovate in an instant – and turn fruit into the star ingredient in your pastries, confectionery, ice creams, sorbets, granitas, and yogurt – we have compiled this toolkit. Read on to discover how our partner chefs have pooled their expertise on all things fruit-related.

Our hope? That these fruits secrets will become your recipe repertoire, your technical guide, and your enabler of creativity – so you can concentrate on what matters most: creating.

In addition to advice on making marshmallows, fruit paste, jams, or even mousses from our fruit purees with no added sugar, our chefs have added some useful tips and tricks to help guide you through the process of preparing recipes.

The 60 flavors that make up our range of fruit purees with no added sugar are perfect for adding variety to the fruit-based delicacies you want to create. At Les vergers Boiron, we use our wealth of expertise to carefully select, custom-assemble, and transform each one. The result? Consistent quality, taste, texture, and color that you can rely on all year round.

From now on, it's your turn!

Composition & method

Fruit puree
Les vergers Boiron 1000 g
 Sugar
 NH pectin

Heat the puree together with half the sugar at 50°C. Mix the remaining sugar with the pectin NH, then add to the puree. Continue cooking until the temperature reaches 103°C. Remove from the heat, cover with clingfilm, and leave to cool. Once cold, whisk until smooth.

Guava	225 g	7 g
Pomegranate	225 g	7 g
Lychee	225 g	9 g
Mango	225 g	7 g
Papaya	225 g	7 g

Tips & tricks //

1. Cool the preparation to room temperature to allow the pectin to absorb the necessary amount of water, before placing it in the fridge to cool fully.
2. Before use, whisk to create a looser texture and make the preparation smoother.
3. This preparation can be frozen.

Mousse

Composition & method

Fruit puree

Les vergers Boiron 1000 g

Sabayon or
Italian meringue

Gold gelatin 200 bloom
powder or leaf

Whipped cream 35%

Defrost the puree.

Prepare an Italian meringue or a sabayon.

Prepare and melt the gelatin mass.

Incorporate the gelatin into the fruit puree.

Add the lukewarm meringue mix or sabayon, then the smooth whipped cream.

Sabayon

In a bain-marie, heat 500g of sugar with 250g of egg yolks at 85°C. Whisk.

When the temperature reaches 30°C, add the hydrated melted gelatin and whisk again until the mix has cooled.

Italian meringue

Heat 500g of sugar in 150g of water at 121°C.

Pour over 240g of frothy egg whites.

Whisk until cool.

Gelatin

Soften the gelatin in cold water, or hydrate the powdered gelatin in 6 times its weight of cold water.

Tips & tricks //

1. Hydrate the powdered gelatin with a small amount of the puree.
2. Use powdered gelatin and hydrate it in 6 times its weight of puree or water, this helps manage water consumption.
3. Using fish gelatin in the preparations means you can make halal and kosher recipes.

ORCHARD FRUITS

4 tropical fruits	360 g		24 g	760 g
Ginger	230 g	or 230 g	24 g	700 g
Guava	200 g		20 g	600 g
Lychee	200 g		20 g	600 g
Mango	400 g		26 g	800 g

Tips & tricks //

1. Hydrate the powdered gelatin for at least 20 minutes.
2. Cover, making sure the clingfilm is in contact with the surface of the preparation to stop it from drying out.
3. Leave to rest in the fridge for 24 hours to reach the optimal consistency for piping.

Cremeux

Base composition & method

Milk	50 g
Cream 35% (1)	250 g
Glucose	10 g
White chocolate 35%	300 g
Cocoa butter	20 g
Gelatin powder	7 g
Water	35 g
Cream 35% (2)	150 g

Hydrate the powdered gelatin in the weight of water indicated.

Melt the cocoa butter (separately) and the white chocolate at 45°C, then mix them together.

Heat the milk, cream(1), and glucose in a pan at 85°C, remove from the heat and add the melted gelatin.

Pour slowly straight onto the chocolate and cocoa butter mix, and emulsify from the center using a hand blender to form a glossy core.

Once the mix has been thoroughly emulsified, add the cream(2) and blend to a uniform consistency with the aid of a hand blender.

Weigh the base mix while warm and add the corresponding amount of puree.

Mix well using a hand blender and pour into a suitable container. Cool quickly.

Leave to rest for at least 12 hours, ideally 24 hours, to obtain the right texture.

ORCHARD FRUITS

4 tropical fruits	265 g
Ginger	225 g
Guava	260 g
Lychee	150 g
Mango	270 g
Papaya	270 g

Vegan cremeux

Composition & method

Fruit puree

Les vergers Boiron	500 g
Water	150 g
Lemon puree	
Les vergers Boiron	15g
Sugar	180 g
NH pectin	12 g
Cornflour	33 g
Vegetable fat	100 g

Mix together the sugar, pectin NH, and the cornflour.
Heat the purees with the water.
Sprinkle on the powders and boil for 2 minutes.
Remove from the heat, cool to 50°C, and add the vegetable fat.
Use a hand blender to blend together, then chill quickly.

For citrus fruits, replace the water and lemon puree with **165 g** of Les vergers Boiron pear puree.

Tips & tricks //

1. Leave to chill in the fridge for 24 hours until the preparation develops a creamy texture.
2. You can use butter instead of vegetable fat if preferred. In this case, please note the recipe will no longer be vegan!
3. Soften the preparation before use for a creamy texture.

ORCHARD FRUITS

Pastry cream

Base composition & method

Eggs	160 g
Sugar	125 g
Cornflour	55 g
Water	100 g

Whisk together the eggs and sugar. Mix the water and cornflour and add to the mix. Blend well.

Use immediately or store in the fridge for later. If using later, mix again before use to create a smooth consistency.

Preparing the pastry cream

In a pan, weigh **220 g** of the base mix, together with the amount of fruit puree specified in the table.

Bring to a boil over a medium heat, whisking vigorously, and cook until the mix is glossy and smooth.

Remove from the heat and add the rest of the puree (if applicable).

Pour immediately into a suitable container and use a hand blender to obtain a smooth consistency.

Re-cover with clingfilm, making sure the film is in direct contact with the surface of the mix, and leave to chill at 4°C for approximately 12 hours.

Take the cream out of the fridge and pour into a bowl.

Whisk at medium speed to create a smooth, glossy consistency for decorating or piping.

Tips & tricks //

Citric acid solution

Heat the water until all the crystals have dissolved.

Citric acid + water
(50/50)

Syrup

For the classic lemon and PGI Siracusa lemon, add 70 g of concentrated fruit syrup to the pastry cream preparation.

Water 55 g
Sugar 15 g

PGI Sicily Blood Orange	200 g	30 g
Pink grapefruit	200 g	
Sudachi	165 g	
Yuzu	170 g	

Glaze

Transparent glazes

Ingredients and method for the neutral base

Mineral water.....	800 g
Sugar (1)	500 g
NH pectin*	40 g
Glucose	400 g
Sugar (2)	700 g

**replace with X58 pectin for
Banana and Coconut purees*

Basic gelatin mass

Gelatin powder	100 g
200 bloom	
Mineral water	500 g

Heat the water in a pan. Mix the initial quantity of sugar with the pectin and add to the pan, stirring well with a whisk. Start by heating over a high heat, using a hand blender to mix. This will ensure the pectin is correctly hydrated. Once boiling, continue to cook for 2 minutes and then remove from the heat.

Quickly add the glucose and return to the heat. Blend with a hand blender and add the rest of the sugar. Mix until you obtain a uniform consistency. Allow to boil for 1 minute and remove from the heat once the mix reaches a temperature of 103°/104°C.

Transfer the neutral glaze to a suitable shallow container and cover with clingfilm, making sure it is in direct contact with the surface of the mix.

Chill in the fridge for 24 hours.

Method

Weigh out **500 g** of the neutral base glaze.

Add the corresponding quantity of cold puree and a solution of citric acid (50% citric acid + 50% water), glucose, and/or gelatin.

Blend with a hand blender until you have a perfectly uniform consistency.

Reheat to the temperature indicated in the glazes table.

Tips & tricks //

1. The viscosity of the mix will differ depending on the fruit used. The glazing method must therefore be adapted accordingly – either pour; pour and spread with a spatula to remove the excess; or tap for a uniform appearance.

2. To ensure consistency between batches, it is advisable to use a refractometer to measure the degree Brix and ensure a temperature of 69°/70° for the base.

ORCHARD FRUITS

Opaque glazes

Base composition & method

Neutral glaze

Mineral water	1000 g
Sugar	500 g
Glucose	1125 g
NH pectin	50 g

Basic gelatin mass

Gelatin powder 200 bloom	100 g
Mineral water	500 g

Neutral base

Neutral glaze	125 g
Gelatin mass	25 g
White chocolate 35%	60 g

Neutral glaze

Pour the water into a pan and add the sugar/pectin mix, whisking continuously. Start heating the mix, blending the ingredients using a hand blender. This ensures the pectin is fully incorporated, hydrated, and expanded. Once it reaches boiling point, wait for 2 minutes, then remove from the heat.

Quickly add the glucose and reheat.

Mix using a hand blender, adding the rest of the sugar as you do so. Allow to boil for 1 minute or until it reaches a temperature of between 103°C/104°C.

Neutral base

Cool the base to approx. 80°C and introduce the melted gelatin mass.

Use a hand blender to obtain a uniform consistency.

Gradually pour this base (in 3 goes) over the white chocolate, emulsify, and mix well.

Pour into a tray to cool. Cover with clingfilm, ensuring that the film is in contact with the surface of the mix to avoid it drying out. Chill the base in the fridge for 24 hours.

Alternatively, make the glaze with the warm base freshly prepared with different fruits. Leave to rest. In each case, it is important to leave it to rest for 24 hours.

Method

Measure out **500 g** of opaque base, if necessary heat in a microwave to 55°C. Add the corresponding quantity of puree, glucose, and/or melted gelatin as indicated. Using a hand blender, mix until all the ingredients are combined and you are left with a perfectly uniform, glossy mix with all the air removed.

Chill in the fridge for 12 hours.

If necessary, reheat to the glaze temperature indicated.

Adapt the glazing method depending on the texture of the glaze and the shape and size of the pastry.

Tips & tricks //

1. Mixing regularly with a hand blender helps the pectin dissolve properly in the warm mix.

2. To guarantee a similar consistency after each cooking process, we recommend using a refractometer to measure the degree Brix at 69°/70° for the base.

3. To produce the gelatin mass, hydrate powdered gelatin 200 bloom in 5 times its weight in water.

Chocolate & Confectionery

Fruit gel for molded bonbon

Composition & method

Sugar
Yellow pectin
Isomalt
Glucose syrup
Citric acid solution

Bring the fruit puree to boiling point in a pan, stirring continuously. While this is cooking, mix the initial quantity of sugar with the yellow pectin.

Incorporate the sugar/pectin mix and continue boiling.

Gradually add the remaining sugar and the isomalt in 3 or 4 goes, then add the glucose.

Return the mix to boiling point.

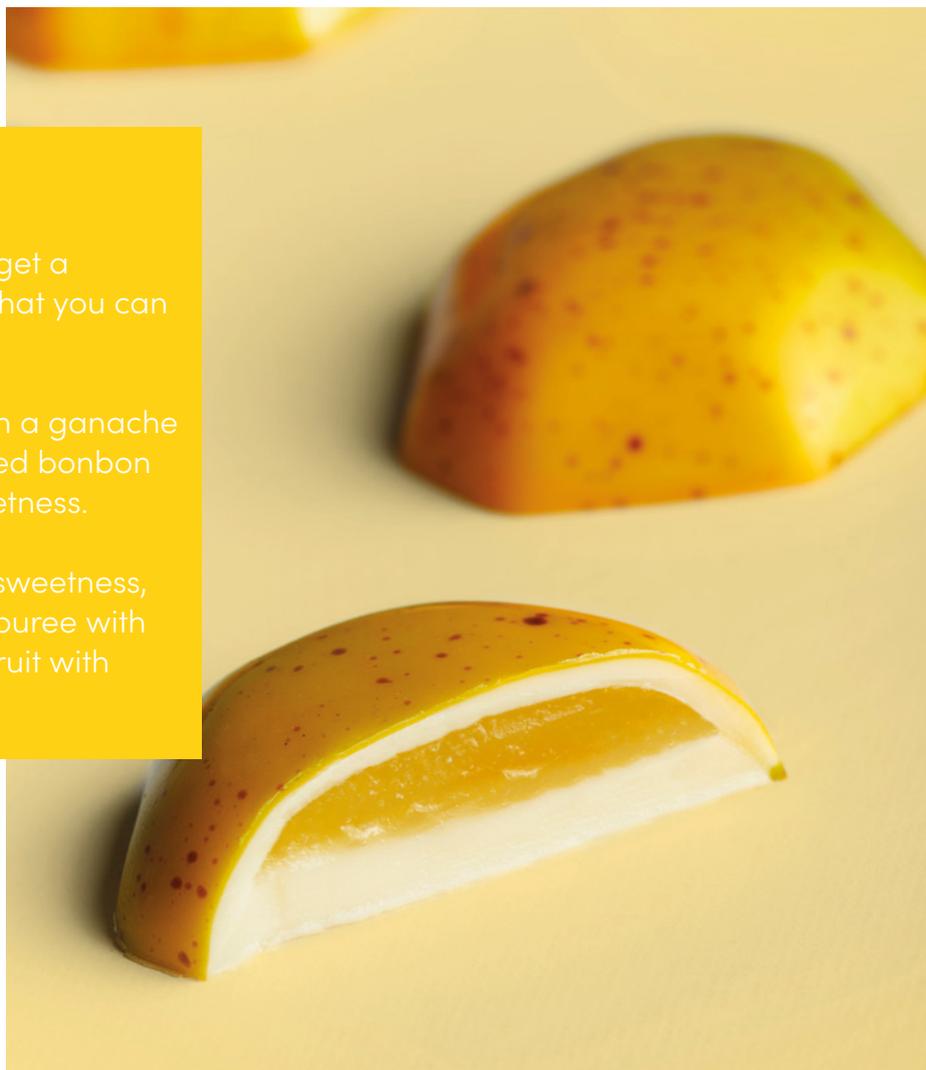

Remove from the heat and add the citric acid solution*.

Pour immediately into a suitable container, cover with clingfilm, and leave to set.

**The weight of citric acid solution comprises equal parts citric acid and water.*

Tips & tricks //

1. Whisk the mix until you get a smooth, soft consistency that you can use in a bag.
2. Use in combination with a ganache as a stable filling in molded bonbon where you want less sweetness.
3. To further balance the sweetness, replace 30 g of the base puree with lemon, lime, or a similar fruit with high acidity.

Fruit ganaches for dipped bonbon

Composition & method

Fruit puree

Les vergers Boiron 500 g

Sorbitol 80 g

Dark chocolate 60%

Milk chocolate 38%

Butter

Invert sugar

Glucose

Heat the puree and the sugars.

Once the mix reaches 70°C, pour over the chopped-up chocolate.

At 34°C, add the butter and alcohol (if using).

Pour at 31/32°C.

Tips & tricks //

1. The ratio of liquor must be 2 to 3% of the amount of puree used.

Use approx. 50 g of liquor to 2 kg of fruit mass.

2. Avoid pairing citrus fruits with chocolate that is too bitter. Acidic fruits go better with milk and white chocolate coatings. Yellow fruits work well with all types of chocolate, whereas red fruits go better with dark chocolate.

Tips & tricks //

For added creativity, choose chunks of different fruits that go well together, or incorporate inclusions and infusions.

Jams

Composition & method

Fruit puree Les vergers Boiron	1000 g
Sugar (1)	100 g
Pectin medium rapid set	8 g
Sugar (2)	600 g
Fruit pieces	

Defrost the puree (and the IQF fruits if necessary).

Combine the initial quantity of sugar with the pectin. Bring the puree and the sugar/pectin mix to the boil over a low heat.

Add the remaining sugar.

Cook at 103/104°C or at 73° Brix on a refractometer.

Remove from the heat and leave to cool.

ORCHARD FRUITS

Fruit paste

Composition & method

Fruit puree

Les vergers Boiron 1000 g

Sugar

Yellow pectin

Glucose syrup

Citric acid solution

Bring the fruit puree to boiling point in a large pan, stirring continuously. While this is cooking, mix the initial quantity of sugar with the pectin.

Incorporate the pectin mix and boil for a further 2-3 minutes. Gradually add the remaining sugar in 3 or 4 goes, then add the glucose.

Cook until the temperature reaches 107°C (225°F) or 75° Brix on a refractometer.

Remove from the heat and add the citric acid solution*.

Pour immediately into the molds and leave to set.

**The weight of citric acid solution comprises equal parts citric acid and water.*

Tips & tricks //

1. When adding the sugar and glucose, make sure the cooking temperature doesn't fall below 85°C (185°F), to avoid the pectic setting too early.
2. You can add 10 g of a suitable fruit liquor at the end of the cooking stage.
3. When coating the finished pieces with sugar, add up to 3% citric acid to balance out the sweetness.
4. For citrus fruits, it is possible to add up to 10% of the concentrated Les vergers Boiron preparation corresponding to the flavor of the fruit jellies.

Papaya*	130 g	30 g	1280 g	175 g	30 g	500 g	

*For these flavors, you will need to add a base fruit puree. This improves the quality and brings out the main flavor.

Gummy Candy

Base recipe

Gelatin mass	125 g
Glucose syrup (1)	125 g
Sugar	15 g
Glucose syrup (2)	200 g
Dextrose	125 g
Citric acid	See table

Place the gelatin mass and the initial quantity of glucose into a bowl.

Add the puree, sugar, dextrose, and the remaining glucose to a pan and bring to the boil over a medium heat.

Continue cooking until the mix reaches 115°C (240°F).

Remove from the heat and pour over the gelatin and glucose, stirring well, until they are combined.

Add the citric acid*.

Carefully pour immediately into cornflour or silicone molds and leave to set at room temperature for at least 12 hours.

Remove the candies from the molds and leave them to dry out for another 12 hours.

Coat the candies in a few drops of oil.

**The weight of citric acid solution comprises equal parts citric acid and water.*

Tips & tricks //

Use a few drops of a neutral-tasting oil such as grape seed oil, or a complementary citrus oil, to seal and add shine to the finished candies.

Marshmallows

Base recipe

Fruit puree Les vergers Boiron (1)	10 g
Glucose syrup (1)	45 g
Gelatin mass	55 g
Fruit puree Les vergers Boiron (2)	75 g
Glucose syrup (2)	50 g
Sugar	135 g

Tips & tricks //

1. To reduce the sweetness and enhance the flavor of the fruit, coat the finished marshmallows in dextrose powder.
2. The marshmallows can be coated in fruit powder.

Place the gelatin mass in a mixing bowl.

Add the initial quantities of glucose (1) and puree (1) and set aside.

Combine the remaining amounts of puree (2) and glucose (2) with the sugar (and the water if necessary) in a pan and bring to the boil over a medium heat. Continue cooking until the mix reaches 110/230 °F.

Remove from the heat and pour the syrup over the gelatin/glucose mix. Whisk on high for 7-8 minutes, or until the mix becomes light and foamy, and has cooled to around 24°C/75°F.

Transfer the mix to the prepared square frame and leave for several hours to set.

Cut the marshmallows into cubes and coat them with dextrose powder. Store in an airtight container.

For the following fruit purees, the quantity of puree varies and you will need to add water. The other measurements are the same.

Banana	Orange & bitter orange
Chestnut & Vanilla	Quince
Coconut	

Fruit puree Les vergers Boiron (1)	10 g
Water	30 g
Fruit puree Les vergers Boiron (2)	60 g

Tips & tricks //

For very acidic purees, aim to mix 25% to 30% with a compatible flavor (for example, 30g of passion fruit and 70g of mango).

Caramel

Composition & method

Fruit puree Les vergers Boiron

Glucose syrup	125 g
Invert sugar	15 g
Cream 35%	200 g
Sugar	125 g
Cocoa butter	5 g
Citric acid	2 g

Add the glucose, inverted sugar, cream, puree, and sugar to a large pan and bring to the boil over a medium heat.

Continue cooking, stirring continuously, until the temperature reaches 120°C (248°F).

Remove from the heat and add the cocoa butter and citric acid. Pour into a 12cm square frame lined with a double layer of clingfilm, or a silicon mat. Leave to cool for several hours before cutting into pieces and wrapping.

Ice creams & Sorbets

LES VERGERS
boIRON.

LES VERGERS
boIRON.

Ice creams & Sorbets

Creating “homemade” ice creams & sorbets is child’s play thanks to the innovative solution from Les vergers Boiron!

Reliable, intuitive, and extremely practical, it’s been designed by professionals, for professionals.

Choose from our range of 60 flavors, work out the total quantity required, the Brix number you want to achieve, and let us guide you through the process. The ideal sugar quantity, the perfect hold, balanced flavors... you won’t be able to imagine life without it.

One solution with multiple benefits:

- You’re free to create without worrying about the technical aspects
- Control your cost price
- Get the nutritional value of your recipe
- Solution is available online; no need to download software
- Creating, measuring, balancing, and keeping your costs under control have never been this easy.

Granitas

Single-flavor granitas

Composition & method

Fruit puree Les vergers Boiron

Mineral water

Atomised glucose 38DE

Sugar

Dextrose

Invert sugar

Citric acid

Place the ingredients in a measuring jug.
Mix.

Place everything into the granita machine.
Serve at -3°C .

The quantities given will make 1 liter of granita.

Tips & tricks //

To avoid the ice separating,
use the minimum dose of
sorbet stabilizer.

Yoghurt

Frozen fruit yogurt 0% fat

Composition & method

Fruit puree Les vergers Boiron

Sugar

Dextrose

Stabilizer

Milk powder 0% fat

Skim milk 0% fat

Yogurt 0% fat

Defrost the puree. Combine the stabilizer with 10 times its weight in sugar. Set aside.

Add the milk and powdered milk to a pan and start to heat. When the temperature reaches 25°C/77°F, add the stabilizer and sugar mix. At 45°C/113°F, add the remaining sugars.

Pasteurize at 82°C/180°F for a few seconds. Cool the base mix to 4°C/40°F. Place in the fridge and chill for at least 4 hours.

Mix the base, puree, and yogurt and place in a sorbet maker; take the mix out at -5°C/23°F. Alternatively, transfer to PacoJet beakers and freeze.

Store the yogurt at -18°C/0°F if necessary.

The ingredients given will make 1 kg of yogurt.

Tips & tricks //

1. Dry mixing the stabilizer with some of the sugar will prevent the stabilizer from forming lumps when added to the liquid.
2. Mixing the milk base with the yogurt and the fruit puree just before processing in the ice cream machine will prevent any change in viscosity due to the natural acidity of certain fruits.

Frozen fruit yogurt

Composition & method

Fruit puree Les vergers Boiron

Sugar

Dextrose

Glucose powder

Stabilizer

Milk powder 0% fat

Whole milk 3.5% fat

Whole milk yogurt
4% fat

Defrost the puree. Combine the stabilizer with 10 times its weight in sugar. Set aside.

Add the milk and powdered milk to a pan and start to heat. When the temperature reaches 25°C, add the stabilizer and sugar mix.

At 45°C, add the remaining sugars.

Chill and allow the flavors in the syrup to develop for at least 4 hours.

Combine the base, puree, and yogurt and place in an ice cream maker; take the mix out at -5°C. Alternatively, transfer to Pacojet beakers and freeze.

Store the yogurt at -18°C if necessary.

The ingredients given will make 1 kg of yogurt.

ORCHARD FRUITS

Fruit puree	Puree	Sugar	Dextrose	Glucose	Stabilizer	Milk powder 0%	Whole milk 3.5%	Yogurt 4%
