Even
la
you

Dear creative optimists,

If you're reading this, you probably share our vision of creativity. Creativity that, to exist fully, must always be in motion.

Creativity that is a dance guided by agility, adaptation and dynamism. It thumbs its nose at automatically closed doors, at ideas that are cancelled before they even exist, at the *'it's not possible'*, the *'we can't do it'*, the *'it's ruined'*, the *'yes but'*.

Creativity that always seeks and finds a solution, that knows that sometimes inspiration and innovation come from the unexpected.

Creativity that rhymes with the culture of challenge, that willingly ventures outside its comfort zone because it knows that this is how we invent, reinvent and reinvent ourselves.

Built on expertise, precision and technique, not forgetting daring and a touch of madness required for each idea, it's this creativity that allows *'create'* and *'dream'* to be conjugated in the present and future tenses.

Creativity also knows that when you conjugate a verb in the plural, you will always go further.

It offers the freedom to believe in your ideas, to bring them to life in their best possible form.

We support all your ideas (*even if sometimes a little crazy*).

We support those who believe in the possible.

We support those who do their utmost to make it possible.

We support the freedom to imagine.

With daring and optimism,

PCB Création

HALF-SHELLS TO FILL

See instructions on our website

PCB Creation has developed a unique concept to easily make filled candies.

Place the first half-shell blister sheet in the magnetic mould.

The second blister sheet is placed in the other half of the mould.

Pipe the filling of your choice into the half shells, remove the protective edge cover around the halfshell (no waste/no mess). Then simply close both sides of the magnetic mould together and leave to cool for 4 hours.

This will give you wonderful decorated filled candies.

POMPONS & POMPONETTES

See
instructions
online

Caution! these products must be filled
and frozen in order to be used.

Pompons and Pomponettes are the fruit of a technique invented and perfected by PCB Creation: the extra-thin shells can be filled with a wide variety of mixtures then frozen. Then just turn out as needed. These shells will sate any sweet or savoury craving.

The Pompons can be filled with mousse or cake (like traditional entremets), ice-cream, coulis, cream cheese... Just freeze to create wonderful individual entremets that are already finely glazed and decorated. The thin shell is easily broken with a dessert spoon, making them so easy to enjoy.

TART SHELLS

Please note that those products are not available in the USA.

We are proud to represent real "Made in France" quality.

That's why we would like to propose this range of tart shells. We have chosen to work with French partners and quality local products in order to better control traceability, limit the impact on the environment and above all stay in line with artisan craftsmanship. We want to highlight the purity of our carefully selected French ingredients (butter, flour, free range eggs...), and have removed all artificial flavourings and colourings that might interfere with the taste of your toppings.

SILICONE MOULDS

PCB Création has a specialised workshop to create your silicone moulds:

We create and shape unique silicone moulds for you in our new specialised design office where our expert team use state-of-the-art equipment. A new service developed with one goal: to make the unique accessible to you. No minimum order (from a mould to several thousand), affordable equipment costs, different processes available, adapted to your requests, and short production times (2 weeks to create your prototype and 4 to 5 additional weeks to manufacture your mould or moulds).

PCB Création silicone moulds are made in our factory in Alsace, using premium silicone, produced in Europe, with remarkable mechanical properties. It resists temperatures from -40°C to $+220^{\circ}\text{C}$, and even more in some cases.

Our team takes all your requirements into account to provide you with a tailor-made solution perfectly adapted to your needs (moulds for logs, desserts - individual or for sharing - or even moulds for chocolate, plaques, stamps, etc.).

THE + OF SILICONE MOULDS

- A wide variety of shape design options
- Suitable for cooking and freezing
 - Very resistant
- Easy to remove from the mould
 - Made in France
 - Reusable

1 Stencil for King's cake "Vitraux"
for 1 piece ø 22 cm
(Usable for King's cake from ø 16 cm)

KING'S CAKE STENCILS

Create original King's cakes with our stencils!

To use them, simply place your dough on the stencil and put it in the oven!
As soon as it comes out of the oven, turn it over, remove the stencil and cover with a thin layer of caramel powder.
Put it back in the oven briefly to get a beautiful golden glaze that will really make your pattern stand out: Now, it's ready!

You can, of course, customize your stencils as you wish - just contact us for more information!

We use premium silicone made in France, suitable for contact with food.

Temperature range: -70°C/+200°C

INDIVIDUAL ENTREMETS MOULDS

Reusable and freezable, these moulds allow you to remove your desserts with ease. We have in fact designed a "support jamb" around most of our reusable moulds which you can pour hot water into in order to remove your desserts more easily. **As such, your desserts will be easy to remove from the mould. Our range includes individual moulds, dessert moulds and yule log moulds.**

In search of exclusivity?

Our team is at your service to offer you a customised solution that best matches your needs.

BAKING PAPER

In order to obtain an even more fabulous result, we have created a compound: “Sublimasse” which once hydrated, will be applied over the baking sheet prior to your biscuit. This product prevents the appearance of air bubbles on the surface of your biscuit and also allows your biscuit to be more airy.

FAT SOLUBLE POWDERS

Procedure:

melt the cocoa butter, add some colouring powder and mix with a brush.

With this base, you can colour your products.

This mixture can be stored: all you need is to melt it before using it again.

For your chocolate gun:

mix 50% of dark chocolate and 50% of cocoa butter. Add the colouring powder.

METHOD:

Keep the product at room temperature (20-25°C/68-77°F) for at least 2 hours before use.

Shake well before use.

Spray an even layer of product on a cold surface from a distance of 20-25 cm.

After use, turn the spray can upside down and spray for a few seconds to clean the dispenser.

Store at room temperature*

**If the product has been stored at a temperature <20°C/68°F, place in a bain-marie
or oven (35°C/95°F) for around 20 minutes to liquefy the product before use.*

VARNISH FOR MOULDING & COATING

070268 is a coating solution made using gum arabic which is used to polish the dragée sweets and should be applied first.

061076 is a solution made using shellac which provides a protective layer against humidity and ambient air and should be applied last.

061076 can also be used as a protective coating for chocolate mouldings (apply a thin layer with a brush, followed immediately by a blow of compressed air for a perfect finish).

061076

Varnish pearly for chocolate moulding
200 g - *N/A: Saudi Arabia, Bahrain, China, Japan, Kuwait, Oman, Qatar, UAE*

070268

Coating solution made of gum arabic 1 kg. This product must be shaken sufficiently before use because it tends to phase out.
N/A: Saudi Arabia, Bahrain, Kuwait, Oman, Qatar, UAE

CHOCOLATE COATING EXAMPLE

COATED HAZELNUTS

- **WHOLE ROASTED** or caramelised hazelnuts 1000 g
- **CHOCOLATE** 3000 g
- **COATING SOLUTION** made using gum arabic 070268 (1.2% of total weight; hazelnuts and chocolate)..... 48 g
- **SATIN VARNISH** 061076 (0,4 % of total weight; hazelnuts and chocolate) 16 g

METHOD

- Place the hazelnuts in the sugar coating machine.
- Gradually add the chocolate, melted at 40°C.
- The ideal average air temperature in the machine is 15°C.
- During the process, heat the walls to remove the chocolate that may have stuck to them.
- Turn off the fan to add the liquids (gum arabic solution and varnish), then turn it back on to dry.
- Add the gum arabic coating solution in two batches and allow to dry thoroughly.
- Add the satin varnish and allow to dry thoroughly.

Caution: Excessive humidity in the room or in the machine (cooling unit) may prevent thorough drying and a quality finish.

Chocolate coated centres must be completely crystallised on the surface before applying the gum arabic solution and varnish. Do not hesitate to leave them overnight at 16°C before finishing.
